

SOFTWARE INNOVATION IS IN OUR DNA

Geekplus solutions come with real-time multiagent orchestration for order fulfillment optimization.

Integrates seamlessly with existing systems

Easy-to-use software reduces training time and aids worker retention

Industry-leading speed to deployment

RMS Robot Manage System

The Geekplus RMS is an advanced robot scheduling and fleet management solution handling route management, task assignment, capacity optimization, safety emergency stops and a host of additional tasks. Employ thousands of concurrently operating robots working across different navigation types.

WES Warehouse Execution System

The Geekplus WES includes software that controls the fulfillment of orders, the movement of loads in automation and intelligent routing and product sorting.

We feel your pain

Labor scarcity and rising costs

Low employee morale

Emissions-reduction demands

Compressed fulfillment timelines

Increased returns and rising SKU counts

Suboptimal use of storage spaces

Let us help

We enable automation through a range of reliable and innovative mobile robotics solutions fit to your order fulfillment needs.

With Geekplus, your warehouse upgrade is in expert hands, allowing you to focus on business growth.

Customers are our partners

More than 1,000 3PLs, retailers and warehouse operators around the world collaborated with us on their order fulfillment automation journey.

ONE-STOP PARTNER FOR ROBOTICS INNOVATION

ONE-STOP ORDER FULFILLMENT SOLUTIONS

RELIABLE, LOCAL SERVICE

You know your business.
We know your operations.

LET'S BRING CALM
TO YOUR WAREHOUSE.

FUELED BY A POWERFUL, PROPRIETARY SOFTWARE PLATFORM

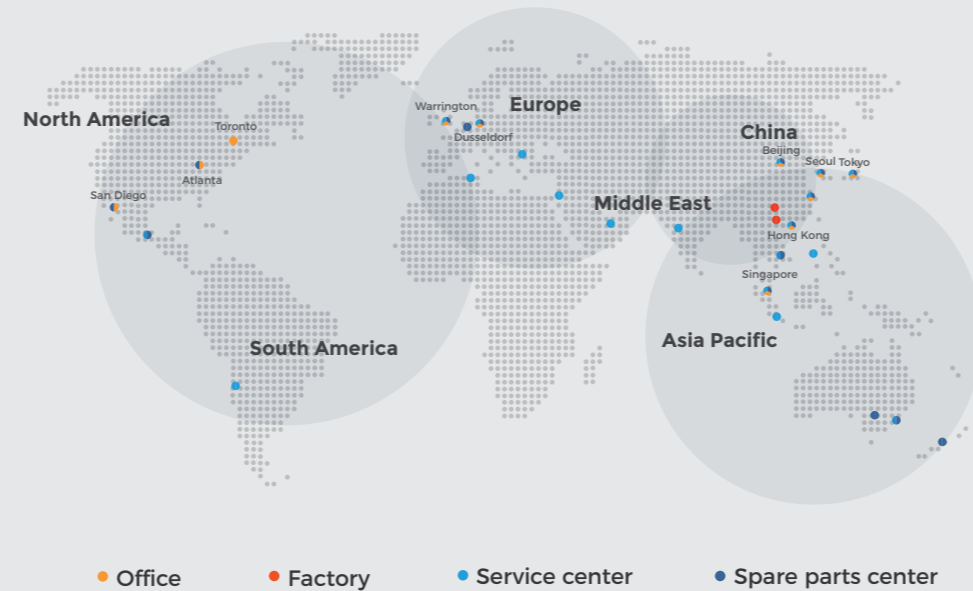

Geekplus is a global leader in mobile robotics technologies, providing modular, scalable solutions for order picking, returns, sorting, transport and storage.

There's no time to waste on inefficient or inflexible picking operations. Costly fixed automation will only constrain your order fulfillment operation during a time of market volatility and shifting consumer demands.

1000+
Customers

40+
Countries

80%
Fortune 500 replicate

With a branch office and a robotics experience center in Seoul, Geekplus Korea is a robust extension of the Geekplus global brand.

Wherever you are in the world, Geekplus provides local, dependable service through knowledgeable regional teams as well as channel and service partners to provide products and services adapted to the needs and requirements of local customers.

Our team is committed to providing reliable and effective solutions with superior service for fast deployment and ongoing support.

Shelf-to-Person

- High flexibility, easy deployment and high throughput
- Low investment, short implementation and rapid efficiency improvement
- Simple to use, easy to relocate

Tote-to-Person

- Dense, vertical storage for increased capacity with enhanced picking efficiency
- Flexible combination of large and small robots to drive high throughput
- Compatible with totes & cartons of various sizes

Pallet-to-Person

- Maximize vertical pallet storage while integrating fast ground-level picking
- Bulk storage capabilities with full coverage of B2B and B2C operations
- Handles variety of goods with different sizes, weights, and shapes.

These modular, scalable mobile robotics solutions enable flexibility as business priorities shift.

Combine robot types for a hybrid solution to meet your business needs. Ask about our sorting and material transport robots to increase your warehouse automation.

The Geekplus difference

Mobile robots to fit any order fulfillment need

Easily scale up as your business grows

Add hybrid solutions to solve new challenges

Reduce warehouse emissions, create sustainable work environments

That's why we're the global market leader in order fulfillment robots five years running.*
